

1920 

The year '1920' is written in a large, white, serif font. To the right of the '0' is a circular emblem containing a white silhouette of a seated female figure, likely representing Liberty or a similar allegorical figure, holding a torch and a tablet.

OUR HISTORY

1920 

The year 1920 marks the beginning of a project in the Portuguese Furniture Industry - ADICO, by the initiative of Comendador Adelino Dias Costa. Installed in Avanca, Aveiro, it starts its activity with the production of iron beds, becoming one of the largest companies in the sector in Europe. 100 years of a history that is documented and serves not only as strength and inspiration to continue, but also to be revisited.

If ADICO's Past describes the beginning of a path through the creation and technical investigation of its productions, his various Presents are a reflection of political-social contexts it has gone through. So, its responses to current markets are reflected in the span of their products from Hospital Metallic Furniture to Leisure Furniture for Hospitality, the latter being stronger since the second half of the 20th century.

Arriving in the 21st century, we celebrate 100 years of ADICO, recovering yet another piece of our history: the sculpture by Architect Januário Godinho, circa 1950, still existing today on the façade of the factory building. This sculpture represents the art of bending steel tube, basic technique for the development of our products, but also a symbol that pays homage to all male and female workers who contributed and were part of this life (and lives) project, which is ADICO, materialized also in our commemorative logo.
